

MANUEL ACOSTA

FULL STACK DEVELOPER

 manuacostaok@gmail.com

 (+54) 11 6502 8141

 San Miguel, Bs As, Arg.

ABOUT ME

I am a 28-year-old Full Stack Developer from Argentina. Passionate about software development, I consider myself a person who can achieve any goal I set, accomplishing objectives step by step. I began my IT journey in 2018 at the National University of General Sarmiento (UNGS) in San Miguel, where I learned about Object-Oriented Programming (OOP) with Java and Python, Testing, Software Specification and Engineering, and Project Management (Jira). In my free time, I decided to delve deeper into web development through various courses. Later, I participated in the state project "Argentina Programa," which allowed me to apply this knowledge in a Full Stack application project with Angular, which served as my portfolio for a while. It was there that I discovered my love for front-end development and decided to create a simpler portfolio with React. Recently, I developed an Android application in Kotlin that records entries and exits using facial recognition, as part of the culmination of my career as a Systems Technician.

EDUCATION

Universidad Nacional General Sarmiento

Graduated in Systems
Technology.

2018 - 2024

Bachelor's Degree in Systems.

2018 - Present.

SKILLS

- Web Development - Advanced
(React, HTML, CSS, JavaScript, Bootstrap)
 - Java - Advanced (OOP, SpringBoot, Hibernate)
 - Databases (Psql, MySQL, PHP, MongoDB)
 - Angular - Intermediate
(TypeScript)
 - Python - Intermediate
(OpenCV, Google ML Kit)
 - Kotlin - Intermediate
 - Git - Intermediate
 - Testing (Postman, Selenium, JUnit)
 - UX/UI (Figma, Draw.io, XML)
 - Jira - Intermediate
-

LANGUAGES

- Español (NATIVO)
- Inglés (Intermedio)
